Kind Attn: Mr. Shiva Shankaraiah, Managing Director

Dear Sir,

We are one of your regular customers of SPM from your organisation.

Whenever we have approached you for development of a new machine to suit our customer requirement, we always found your views and feedbacks valuable and were able to satisfy the customer with the quality of the component supplied using your machine.

We also appreciate the delivery and quality performance of your company and the excellent after sales service.

May we take this opportunity to suggest that it will be ideal if your future machines incorporate good productivity features like quick tool changing and faster parts load/unload facilities.

Thanking you

Yours faithfully
For IM GEARS PVT LTD
