Subject: RE: See linkages - Letter

Dear Mr. Shiva

We are using the polygon turning machine , Model TPT-2S, and are very much satisfied with the performance of the machine. The operation with this machine has helped us to reduce the cycle time for the components and at the same time improvement in quality.

We also appreciate the services rendered throughout this period for helping us to generate the process , procedure and development of collets for new components. We are also planning to add another polygon machine in our existing fleet of CNC and VMC machines.

Thanks & With Best Regards,

Baldev Singh
Vice President - Sameer Group
